Year fixed effect	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes
Observations	94	690	94	690	94	690	94	690	94	690
Wald chi2	23.242	27.561	42.199	65.648	13.719	28.432	5.580	50.453	29.450	28.516

Note: The dependent variable (TFP) is estimated according to Akerberg, Caves, Frazer (2015). Instruments for level equation are lagged differences. Heteroscedasticity-robust standard errors are in brackets. Controls include firm size, academic employees share, technological potential, price competition, foreign ownership and appropriability. The Arellano-Bond test for zero autocorrelation in first-differenced errors does not reject the null hypothesis of no serial correlation at order two. Hence, the moment conditions are valid. The Hansen test of overid restrictions confirms the validity of the instruments in each equation.

* $p < 0.10$, ** $p < 0.05$, *** $p < 0.01$
